RELEVANT EXPERIENCE

The Iron Yard

Data Science and Back-End Engineering with Python
Durham, North Carolina

Jul 2016 - Oct 2016

- An intensive 12-week programming course designed to prepare students as professional junior-level software developers who are able to approach and solve problems like a developer.
- The program was split into four three-week sections:
 - Python Fundamentals
 - Data Science
 - Web Development
 - Capstone Project

PROJECT

eduFactor

The Iron Yard Capstone Project

- Developed an interactive Django web application with a back-end in Python to be used by elementary-aged students to increase familiarity with technology enhanced test items
- Followed Agile methodology to create eduFactor with two other collaborators
- Organized question, answer, and score data in a relational PostgreSQL database
- Built interactive questions using JavaScript and jQuery
- Used HTML, CSS, and Bootstrap to provide a user-friendly interface

WORK EXPERIENCE

Title I Math Specialist

Bellwood Elementary School, Chesterfield, Virginia

Jul 2013 - Jul 2016

- Remediated tier II and tier III students in mathematics
- Planned and executed school wide Math and STEAM Nights
- Coordinated volunteers for Math and STEAM Nights
- Facilitated monthly Math PLCs for all grade levels to discuss data and inform instruction
- Trained as a member of the Crisis Team
- Collaborated with grade level teams for planning math instruction
- Adapted mathematics lessons for struggling students
- Evaluated students mathematics knowledge prior to Child Study meetings
- Informed school of county mathematics ideas by being the Lead Math Teacher
- Analyzed benchmark data with teachers to inform instruction
- Facilitated Child Study Intervention Team meetings
